PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in software automation, AI infrastructure validation, observability, and performance benchmarking. Skilled in QA automation, API testing, LLM deployment, and monitoring enterprise-scale systems using modern testing and observability tools. Strong analytical, debugging, and problem-solving abilities with exposure to Agile workflows and scalable infrastructure environments.

EXPERIENCE

Software Test Engineer Apprentice — UCS AI Sizer Team

June 2025 - Present

Cisco Systems (India) Private Limited, Bengaluru

- Deployed LLaMA models via NVIDIA NIM containers on Cisco UCS C885A M8 H26 servers (H200 NVL GPUs) for mission critical AI performance validation.
- Executed LLM benchmarking using AIPerf to analyze TTFT, p95/p99 latency, throughput, concurrency scaling, and GPU utilization metrics.
- Designed mixed short-context and long-context workload simulations to evaluate inference performance under production like traffic conditions.
- Configured multi-turn conversational workloads with Poisson traffic patterns for enterprise AI serving and long-context inference testing.
- Monitored GPU memory, compute utilization, and inference KPIs using NVIDIA DCGM exporter, Prometheus, and Grafana dashboards.
- **Tech:** NVIDIA NIM, AIPerf, Grafana, Cisco UCS C885A M8 H26, H200 GPUs, Python.

EDUCATION

Sri Chaitanya Technical Campus, Hyderabad

Aug 2020 - Jun 2024

Bachelor of Technology — Computer Science and Engineering

CGPA: 7.58/10

Gouthami Junior College, Hyderabad

Feb 2018 – Mar 2020

Class XII (TSBIE)

Percentage: 94.30%

PROJECTS

Bug Reproduction and QA Workflow Management System

React, Spring Boot, PostgreSQL

- Developed a full-stack application to streamline bug reporting, reproduction tracking, assignment workflows, and status management for QA and development teams.
- Built RESTful APIs using Spring Boot and integrated PostgreSQL for efficient bug data storage and retrieval.
- Implemented role-based access workflows for testers, developers, and administrators to improve collaboration and defect lifecycle management.
- Designed responsive React components for real-time bug tracking, workflow updates, and issue monitoring.
- Improved debugging efficiency by enabling structured reproduction steps, environment tracking, and centralized issue management.

TraceOps — AI-Powered Root Cause Analysis System

Python, FastAPI, LangChain, ChromaDB, React.

- Developed a RAG-based incident analysis system using FastAPI, ChromaDB, and LLMs to automate root cause identification from application logs.
- Implemented semantic log retrieval with vector similarity search and OpenAI embeddings, enabling intelligent issue correlation across 15+ log patterns with sub-second response times.
- Built a React-based dashboard for incident investigation and AI-driven debugging, and deployed the solution using Render and Vercel.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript

Frontend: React, Angular, HTML5, CSS3

Backend & APIs: Spring Boot, FastAPI, REST APIs,

Databases & Cloud: MySQL, PostgreSQL, Basics of AWS

AI/LLM: Machine Learning, AIPerf, LangChain, HuggingFace Transformers, ChromaDB

Testing & Automation: Selenium, Postman

DevOps & Monitoring: Docker, Git, GitHub, Grafana, Prometheus, Linux

Coursework: OOP, DBMS, Operating Systems, Computer Networks, LLM Engineering, Retrieval-Augmented Generation (RAG)

CERTIFICATIONS & ACHIEVEMENTS

Cisco Certified Network Associate (CCNA) — Cisco

Jun 2026

Problem Solver: Leetcode / GeeksforGeeks

Ongoing

- Solved problems on Leetcode and GFG, strengthening DSA and competitive programming skills
